

TOPIC

CI/CD

Reasoning:

Hot topic that needs to be resolved

What went well?
What should we keep doing?
What should we celebrate?
Where did we make progress?

What went poorly?
Where did we have problems?
What was frustrating to us or others?
What held us back?

research
about
possibilities
was done
effectively

the general
idea was
good

usability

execution

no solution
to face
problems

Github actions
doesn't provide
display output which
would be needed for
GUT testing to run
automatically

Still do parts
of the
planned
pipeline
manually

change of
plans

don't do
CI/CD

include fewer
parts of the
project in
pipeline

research
other
possibilities

try to exclude
things from
current plan
to make it
work

What ideas do you have?
What ideas do you have for future work together?
Where do you see opportunities to improve?
What has untapped potential?

How should we take action?
What do you believe we should do next?
What specific things should we change?
What should extend beyond this meeting?
